

## PROFILE

I am a biomedical engineer with strong proficiency in HTML, CSS, and Bootstrap, passionate about creating clean, functional, and user friendly web designs. My technical foundation in biomedical engineering has honed my analytical skills, attention to detail, and problem solving mindset, qualities I bring into every project.

I am particularly enthusiastic about this collaboration opportunity as it will allow me to gain deeper insights into team based design processes, learn from diverse perspectives, and contribute meaningfully to a shared vision. My goal is to deliver high quality work while expanding my skills in cross functional collaboration within the web development space.
